300. Biol. basis for killing shown by ease with which boys learn hunting.
334. Warfare among hunters rare & doubtful

341 Hunter not aggressive.

254-5-60. E. Africa - no positive evidence of game because of human remains

293 - Evolution of hunting

331/4 Warfare & hunters.

85: Pallins - original hunters are apfluent (Desiring little) / the same Lee p. 30

86 Anthropologists look at hunter for bourgeois standpoint.
hunters seem neither harassed nor ambitious. Have more leisure time
no anxiety

89 no anxiety: confidence that food will come

90 Happiness result of homeostasis rather than specifically hunting

90 tremendous stability of many Pleistoc. hunters

91 abandonment of the field - due to lack of concern - not econ. reasons.

91 Turnbull: pigmies fight a lot - but without malice - Very emotional
lack of wild craft & success

92 meat more useful in cold than in warm climate

92 One practical support of game - ~~still~~ Pallins more characteristic of Pal. hunter

53 Haxel = hunting is not coordinated activity

94 Why gatherers not with more?

39. 2-3 days worth enough for adequate diet.

43 Hunter's life not nasty & scarce. Ok 60-70% of food: gathering
