

'slow spread' oth. See examples of Lidz (1926), having an
anti-psychiatry.

93

B. 133

Lidz: there has never been a schizophrenic who came from
a stable family.

In *The Divided Self* he describes Schizo as process of self annihilation;
In *Politics of Experience* as potential
break through or liberation.

Laing & anti-psychiatry. P. Lidz.

133. Rieker has never been a schizophrenic. He came from a stable family.
136. Garthoff m. takes lead in separation process / reacting. Between 2-4 the child moves out, becoming a member of the family beyond the simple m-child unit. in schizo family m-child remains a symbiote.
137. schizo reactions more common: the locus-e. differs.
138. schizo culturally conditioned ?? - rather natural pattern!
139. Schizo. psychosis = disturbance in thought & language without degradation of intellectual potentials, a confusion of thought without an impairment of intelligence."
139. with some people - hereditary matter
139. be laing - Marcuse - from tradition. - civilization impeding human potential.
140. be laing in a self. I. Divided self schizo process of self-annihilation, E. Pol. of Ex. potentially breaking out liberation.
149. "American Meyerian tradition has refused to accept mental distress as illness." (not so many (most?) other Am. psychiatrists.
154. Is schizo historical conditioned? No clear answer -
155. Laing says it is impossible to love :(?)
156. Family absolutely necessary.
