

N 40

A. Montagu. Chromosomes and Crime

46. Y Chrom. seems to possess a elevated aggressiveness potential, whereas the X Chrom. seems to possess a high gentleness component.

46. Heredity is the expression not of what a person is genes at conception, but of the reciprocal interaction between the inherited genes and environment. (!)

47. Features of XYY: tall, dull, high incidence of epileptic and epileptiform conditions

48. not all XYY → aggressive behavior

J. Nielsen, Y Chromosome in male psychopaths
- large Y chromosome carriers exhibit certain
genetic disposition to criminal behavior
