

Mappin, The Book of Man.

Napier

(77)

☺

L15

192 Ramapithecus = 10 000 000 - closely related to human stock
conjecture that was bipedal - carnivore - tool user?

193 ↓ probably ancestral to austral Australopithecines of S Africa
197 Small brain case, bipedal gait less evolved than modern man.

194	Austral: brain volume estimate	375-650 cc. (modern man 1350-1500)
	<u>habeles</u>	680
	<u>erectus</u>	978 (775-1225)
	<u>sepiens</u>	1300. (1000-2000)

196 Robinson to suggest that Paranthropus was vegetarian
Australopithecus, like Homo habeles, was primitive hunter
or also scavenger.

202 Homo habeles - hunter of small game & scavenger of flesh
or large animals - dependent on a certain amount
of fruit & berries
Perhaps H. habeles was more carnivorous than H. erectus
whose dependence on vegetation food has been estimated at
75% (E. Howell & Clark)
