P. T. Young. The Role of Hedonic Processes in Motivation, in: Nebraska Symposium on Motivation, ed. R. Jones (ed) Univ. of Nebraska, 1955 - p. 193-238.

194.

hedonic processes undulate direction that is characteristic of many acquired motives.

193/4

affective processes = physical processes within the scope of animal - by animal behavior, sustained or fluctuating activity - purposes. - according to hedonic principle → acquisition / action, stable disposition to act, or value systems.

204.

Experiments & demonstrate incompleteness of the S-R. formulation.

233.

In acquired motives there is always a tension factor. The strength of the tension is correlated with hedonic intensity or with direction or frequency of affective arousal.
