14 The common ancestor of apes, monkeys, apes
& man adapted more than 75 mill. yrs. ago
to life in the trees (stereoscopic vision &
good grasp) (land)

14 Some returned to ground. I believe,
existence: baboon & man.

20 drives

20. Few would deny that something like drives
exists in man. What is argued what drives are
specific in man.: Hunger, sex, thirst, fear, sleep
seen acceptable to every one; in man doubt are
drives for power, security, joy, & creativity.

20. Differentiate how drive is deterministic and is a
very loose sense, a capacity for behavior that is
over less deterministic

! [reactive app. also not strictly determined, not hunger,
thirst, - different for need for something?]

Note on Alland.

According to Alland

the capacity for ag. not different
from capacity for tight rope walking.

He says mother is automatic, except
some reflexes - but does not want
greater ~~propensity~~ ~~capacity~~ ~~contributions~~
propensity for some.
Everything is learned.

24. No one type reflects the real, imitative action / man
