FROMM, Erich. *On disobedience and other essays.* Seabury, 1981.
135p 81-2260. 9.95 ISBN 0-8165-0550-X. CIP

A collection of nine essays published in various books and magazines from 1959 to 1966. Fromm was a major social and psychological thinker of the 20th century, and although some of the essays are a bit dated (mentioning Khrushchevism, for example), the author's powerful pleas for social justice and his insightful wisdom still read well. The book does make some essays available that might be difficult of access, but a general college library with a sampling of Fromm's many works would find this volume redundant, as the collection merely elaborates in various ways on his well-known humane socialism and socially responsible neo-Freudian ideas. Minimal annotations, no index.
