

- 54 Differentiation of excitement in first 2 ps.
- 65 Normal adult hum. behavior develops only through the stimulation of other people. ("learning")
66. Milder deprivation
- 90th sensory deprivation - hellings motion
91. Pilot experience
- 92 Relative sensitivity of eye.
- 100 selection of stimuli
- 126 hypnosis
- 133 96% of experiments on animal learning have been done with rats.
- 135 Learning
 response
 habit
- 136 Thinking, to some degree a spontaneous or self-sustaining activity
- 141 operant reinforcement.
- 146 conditioning does not require conscious awareness or intention
(but not to please ...; unconsciously.)
- 157 improvement of skills
- 169 Relative to animal, the prefrontal cortex specificity
- 174 REM & dreaming
- 175 Dr. time = 20% of sleeping time
- 176 irritability & anxiety as result of sleep deprivation
- 177 alpha waves (rhythmic) represent normal spontaneous res. activity
- 180 Age regression
- 181 important things more & only remembered
- 189 inner thought "as printer word": cat
- 189 most primitive bite: fully developed language
- 198 Piaget, development of intelligence
- 201 Creative thought.

P 87

- 217 Causes of intelligence
- 218 feeding, intelligence in rats
- 222 I.G. & social class
- 225 I.G. & nationality
- 228/9 Creativity
- 239 need, fears, wants, as far as they can be behaviorally documented: Ex. Bogy in Cigan!
- 242: Physical motives: a) supply, avoidance, specific maintenance
- 242: Food deprivation evokes the sex depriv.
- 244 Starvation does not result in major crime (Sokolov)
- 244 What motives are to be inferred in major crimes "social needs"?
 - a) association v. primary satisfaction
 - b) striving for stimulation (built-in)
 - c) novel or changing stimuli
 - d) complex stimuli
 - e) animals will introduce variety even when there is no reward
 - f) sheer physical contact - (cloth or wire mouse - regardless of feeding)
- 249 Gerson self-stimulation ~ reward
- 249 monkey interested in learning without reward
- 249 There is a ~~reversion~~ tendency to resume interrupted task that are being done without extrinsic reward.
- 252 Total isolation always virtually intolerable for human as well as if all physical needs fulfilled
- 252 Some social needs seems to dim increase with deprivation.
- 256 What is basic motiv in arbitrary (degree of genuineness!!)
- 257 hint of basic motivation.
- 258 Personality typologies.
- 266 Rationalization (Cigarette smoking)
- 267 Displaced aggression
- 268 Lynching as economic demand
- 277 neurotic conflict produced S. ambiguous stimulation
- 281 most repressed to try - sex & aggression (as in cat!)
- 282 rationalization for aggressive act.
- 282 projection
- 284 Reaction formation
- 286 Anal of hydron.
