

Notes on Inst.

K 23

Fletcher's instinct in man.

81. Harlow's experiments show significance of innate needs.
ad. p. 12.

30. all post-Varianians: instructional beh. outcome of
evolut. process.

30. James, instinct - definition.

32. " element of learning.

95? Lloyd Morgan, definition of instinct.

42/3 Hobhouse, definition of instinct.

[Among insects: instinct is determining
behaviour. But this is quite different from
assumption of Freud & Lorenz - that in man
it denotes an impulse (it's back for instinct,
it can be manifest itself in many ways.
Craving ad p. 19.
desire

43. distinguishes between compound reflex or instinct
condition element one of the most important
criteria of instinct. - some instincts approach
compound reflex type - others felt as craving.
ad. p. 19.

43. Inst. is part independent on stimulus.

46. Instinctive innate cravings, like an specific inheritance
but still do not comprise fixed inbuilt motor
patterns.

[one of variation] inst. key - different from
possibility of difference between ag. & sex.
46. Restrictive craving: psych. can not be founded on row of
separ. instincts.

The Fdaer

E

McDougal

47 Definition of Instinct.

48 "

48. perception of stimulus as action can be modified
instincts while they can not be eradicated, they do
not persist through life experience in same form.
emotion - sentiments.

emotions bound to specific instincts.

49

Parallel instincts & attitudes emotions

49

same permanent nucleus of emotions =
necessary criterion for instinct.

49

What does not fit in instinct - general innate
feelings. ^{Sec 24} like sympathy, suggestibility,
Imagination & Play.

General problem impulse life aspect of
passivity. - passion (passive)

50. Every social environment imparts gradually
or jerried in it systems of ^{increasing} extreme complexity
while they remain unchanged as regards their
most essential attributes

50

Doubtful if the behavior of any animal is wholly determined
by instinct (Sec. p. 27)

51

aware of complex influence of different cultures.

51.

McDougal on paganism.

Fletcher, :

57 d.c.d. : central part of the innate disposition etc. = instinct
= propensity. = conative affective disposition
propensity capable of functioning, in relative
independence of both the cognitive part on the motor part
of a total instinctive disposition.

91/ reputation of the environment. anthropol. critique.

env: the fact remains, that ag. no 8th
present in such soc.

92.

Common elements: walking, eating, drinking, defecation,
sleeping, mating, sexual intercourse, care of
young infants, fear, avoidance of anger.

this refers again certain among - physiologically
conditioned as well others.
