

Freud's Ova Case

E 10

[1905e] Fragment of an Analysis of a Case of Hysteria, 1905

Vis. 5

Psycho neurosis = negative of obsessions 1897 letter & Flep

10. Every one can analyse his dreams; technique from Freud
10. analysis of dreams indispensable requirement for understanding of neurosis.

12. Not technique, after Freud: not central around symptoms but illness p. starts

(absp. 16/13) psychosomatic etiology is too good a label exception for hysteria

18. Attempt to make a distinction of the human & social environment

(especially family) circumstances for patients, as of somatic data and symptoms

24. Always a hysteria: psychical trauma, conflict of affects at - brought up after
Brenner Fr. path. - an disturbance in the sphere of sexuality

28. Hysterical: if young girls feel an occasion for sexual excitement
unpleasant!! reversal of affect!

29. Any healthy girl would have felt genital sensation, but vs overcome
{ unpleasant feeling - } disgust etc is proper entrance of
abnormal canal.

! send: all his findings apply to neurotic but to normal men

2)

35c No formal agreement taken f. ... K. & her love
over Dora

38 A conceal story under resistance

47 symptom is the subject of a second phantasy, i.e. ones
of the meanings of the symptom

47/8 caught = symbolic expression of ~~the~~ ^{the} ~~fact~~ ^{fact} of cl.-genital ~~substitution~~

50 Perversions = un h't'd development.

All psychoneuroses a person with strong dual
repressal perverse tendency.

52 Looking for penis continuation of sucking the nipples

53 symptom can change its meaning

54 D. vs. i. love o. her father

56/7 Removal of earlier love ph's

60 Dora's homosexuality

3.

Jova.

711

Dream stands - two legs: checked point or current
elating cause.
