I learnt that his attachment to the mother had been greatly underestimated.

In a number of cases it persists well into the fourth year, or in one in the fifth year.

"These facts show that the pre-bedpus phase in women is more important than we have hitherto supposed."

"... it seems that we have to retract the universality of the dictum that the bedpus complex is the nucleus of neurosis. But if anyone feels reluctant to adopt this correction, he need not do so. For on the one hand, we can extend the content of the bedpus complex to both parents or, on the other, we can give due recognition to our new findings (Jagers) that women reach the normal, positive bedpus phase not only after surmounting a first phase dominated by the negative complex."

253/4

"Our insight into this early pre-bedpus phase in the little girl's development comes to us as a surprise, comparable in another field with the effect of the discovery of the Minoran - Mycenaean antiquities behind that of Greece."

254

"Gayley connected with ^{to his first} mother attachment is connected with me for example ... that it seems as if it had undergone some specially inconvertible repression. But possibly I have received this impression because, when I have analysed women, they have been able to cling on to that very father-attachment."

in the by took refuge in the early phase
of her I am speaking. It could in fact
appear that women - analysts - have been able
to appreciate the fact with greater ease & clearness
because they had the advantage of being suitable
mother-substitutes in the transference
situation with the patient during the
study in

256 N. Elect. complex - but only male delta

258 Preoedipal attachments more important in women
than in men

262 In the case of women, the fact that they have
often had to be with a father, the possibility
of not being loved by mother
But I not sure either, if one analyzed
children who have been analyzed butted as long as
those of primitive races, one would not
expect the same complex - so great as
the need for a father

264/5 The fact that women are more likely to be
in a relationship with a father

265 once said - ... - ... mother

266 Impossible to say if after father's death
or during his life

266 The dream of being eaten I have never found only in

267 M Stimulate clitoris of clearing - Let's just
accuse of

270 Lamp de first: shallie what/ acting of
prescribe file to m.

278 M Klein: G.C. begins 2 years of G.F.
And against

W by H. 1952

283 "But is no use trying to get rid of
man's apparatus in children"

283 Against man; strangulation of love & identification
of work, upper stratum of men with independent minds
-- no fine direction to the dependent masses"

284 "An unpleasant picture comes to one's
mind of mills for grinding so flour. If
people might have left the mill
floor."

287 "But one thing we can say: before father
the first of culture works at same time
against God"

288 Continuous displacement/inst. even as a restriction of inst.
in pulses

Rebels Theory

133 Instead of speaking of conflict between sex
Instincts & ego instincts, better to speak
of object libido & ego libido or
object catexes - ego

135 Libidinal Sexual or love instincts
v. Self Instincts

235 Instincts "tenderness inherent in living
substance toward restoring a earlier
state of things:

"All series of instincts have been
in operation and working against
each other from the first origin of
life"
