How Aaron Swartz paved way for Jack Andraka's revolutionary cancer test

Jack Andraka's breakthrough pancreatic cancer test would have never come about were it not for access to online journals -- what Internet guru Aaron Swartz was promoting before his death. Andraka "religiously" used free online academic journals in the research because "in most online databases, articles cost about \$35, and there are only about 10 pages."

Massoud Hayoun | Jan 30th, 2013

Sci-Hub setzt Maßstäbe!

- ✓ Schnelligkeit
- ✓ Bequemlichkeit)

Kramer, B. (2016). Sci-Hub: access or convenience? A Utrecht case study (part 1&2).

Heathers, J. (2016). why Sci-Hub will win.

<https://medium.com/@jamesheathers/why-sci-hub-will-win-595b53aae9fa>

Sci-Hub

1. Google article, first page of results is 100% likely to contain PubMed or journal page.
2. Click relevant site.
3. Copy PubMed ID or DOI (digital object identifier; the 'serial number' of published online documents) to Sci-Hub main page.
4. Push enter.

My Institutional Access

1. Load library search page.
2. Click 'journals' in the OPAC.
3. Enter the name of the journal where the article resides.
4. Select a journal from the list presented.
5. Select a form of access to the journal (often this is provided from different databases, and you need to select the right one. For instance a "Legacy" collection may only access from 1977 to 2001, and a current collection may access from 1991 to present).
6. Insert your institutional login / password.
7. Wait while the hamsters in the proxy server shake off their sawdust, adjust their tiny, adorable trousers and start turning the wheels.
8. Insert the title name in the search bar of the journal, push enter.
9. Hope it works — these have a tendency to either a) reject queries for being too long b) reject queries for not being long enough (i.e. not recognising text you pasted into the search bar), c) throwing an error because you put in a 'special' character, such as a semi-colon, colon, question mark, hyphen etc.
10. Click the article if the search works. If not, browse through the journal tree (Year, Volume, Page Number) until you find the right research. Click. Science time.

Das Urheberrecht?

Das Angebot von Sci-Hub ist rechtswidrig. Aber auch die Nutzung?

- Vervielfältigung ja (§ 53 UrhG)
- Lesen (j)ein (§ 44a Nr. 2 UrhG)
