Karl Marx

Karl Heinrich Marx (May 5, 1818 – March 14, 1883) was a philosopher, political economist, historian, political theorist, sociologist, and revolutionary, whose ideas are credited with the development of modern communism. Marx summarized his approach in the first chapter one of "The Communist Manifesto", published in 1848: "The history of all hitherto existing society is the history of class struggles."

Marx argued that **capitalism**, like previous socioeconomic systems, would inevitably produce internal tensions which would lead to its destruction. Just as **capitalism replaced feudalism**, he believed **socialism** would, in its turn, replace capitalism, and lead to a **stateless, classless society** called **pure communism**. This would emerge after a transitional period called the "**dictatorship of the proletariat**": a period sometimes referred to as the "workers state" or "workers' democracy". In section one of "The Communist Manifesto" Marx describes **feudalism**, capitalism, and the role internal social contradictions play in the historical process:

Marx argued for a systemic understanding of socio-economic change. He argued that the structural contradictions within capitalism necessitate its end, giving way to socialism:

On the other hand, Marx argued that socio-economic change occurred through organized revolutionary action. He argued that capitalism will end through the organized actions of an international working class. "Communism is for us not a state of affairs which is to be established, an objective to which we must adjust itself. We call communism the real movement which abolishes the present conditions of this movement result from the premises now in existence."

While Marx remained a relatively obscure figure in his own lifetime, he began to exert a major influence on workers' movements shortly after his death, and gained impetus with the victory of the **Bolsheviks** in the Russian...

Technik

VuFind benutzt Solr als Suchmaschine

→ alle Funktionen von Solr (Ranking, Boosting, Stemming, Facettierung, Filterung, ...) stehen in VuFind zur Verfügung

→ Solr kann mit allen als Text darstellbaren Daten umgehen, nicht nur bibliographischen Datenformaten → integrierte Suche „über alles“

Kern von VuFind programmiert in PHP

Smarty als Template Framework für die Oberfläche

→ mit HTML- und CSS-Kenntnissen leicht anpassbar

Anbindung an lokale Bibliothekssysteme

VuFind ist mit jedem lokalen Bibliothekssystem einsetzbar

Zugriff auf Daten und Funktionalitäten (Verfügbarkeit, Ausleihe, Benutzerkonten) von Bibliothekssystemen über Treiber-Architektur
fertige Treiber z.B. für Aleph, Voyager, Evergreen,...

Problem (wie bei allen „Katalog-Ersatz-Oberflächen“, egal ob kommerziell oder Open Source): brauchbare, offene Schnittstellen zum Zugriff auf Bibliothekssysteme?!?

Lösung? NCIP? Jangle? ILS-DI?

FORDERN SIE ZUGRIFF AUF IHRE DATEN!

Was unterscheidet VuFind von anderen Lösungen?

VuFind ist ein Open Source Projekt (GPL v2)

keine Lizenzkosten, aber selbstverständlich nicht kostenlos (Ressourcen für Anpassung, Betrieb, ...)

Sie können damit (fast alles) tun, was Sie wollen (free software!)

getragen von einer weltweiten Entwickler- und Anwendergemeinschaft

Dynamische soziale und organisatorische Entwicklung der VuFind-Community

individuelle Entwicklungen der Anwender fließen zurück in VuFind → was wir für die Nationallizenz-Suchkiste entwickeln, steht Ihnen in VuFind frei zur Verfügung → Nachhaltigkeit!

Sie wollen sich beteiligen?

Auch wenn Sie nicht programmieren können/wollen, es gibt viel zu tun: Dokumentation, Übersetzung, Testen, Ideen einbringen, ...
