

REFINITIV WORKSPACE FOR STUDENTS

REFINITIV WORKSPACE

BE A STEP AHEAD OF YOUR PEERS

Technology and performance

- Significantly lighter install that reduces deployment time and cost
- Interface designed from latest web browser technology allowing seamless onsite and remote access
- Universal access on Windows and Mac OS, mobile and Microsoft Office

Intelligent and smart

- Adaptive framework for Banking, Wealth Advisory, Asset Management, and Trading
- Faster, smarter and more relevant results, with instant previews as you type
- More powerful structured and natural language search driven by machine learning

Open platform for workflow

- Seamless, interoperable and collaborative data-powered workflows
- Sophisticated models offer unique insights beyond spreadsheets
- Data access across any in-house or third-party applications on your desktop

Tailored user experience

- Familiar browser paradigm and navigation menus to access most relevant tools
- Top apps revamped and improved for an improved overall user experience
- Become certified and get a leg-up as you move into the workforce and benefit from a stronger curriculum that fosters applied learning.

WHAT CHALLENGES ARE ACADEMIC INSTITUTIONS FACING TODAY?

VIRTUAL LEARNING

- Managing virtual learning effectively with minimal disruption during the COVID-19 pandemic has become a rapidly expanding challenge for institutions.
- Ensuring both educators and students have access to financial intelligence is essential even if they are away from campus.

PRODUCTIVITY AND EFFICIENCY

- Academic institutions need to provide students best-in-class solutions to boost results, giving them a head start as they transition into the workforce.
- The need to advance applied learning and have a user experience that boosts productivity with non-tailored solutions is difficult.

SECURITY

- Making sure that students who have graduated from or left the university are not able to access databases.
- It is challenging to deactivate licenses immediately after a student leaves the university due to limited resources for license management.

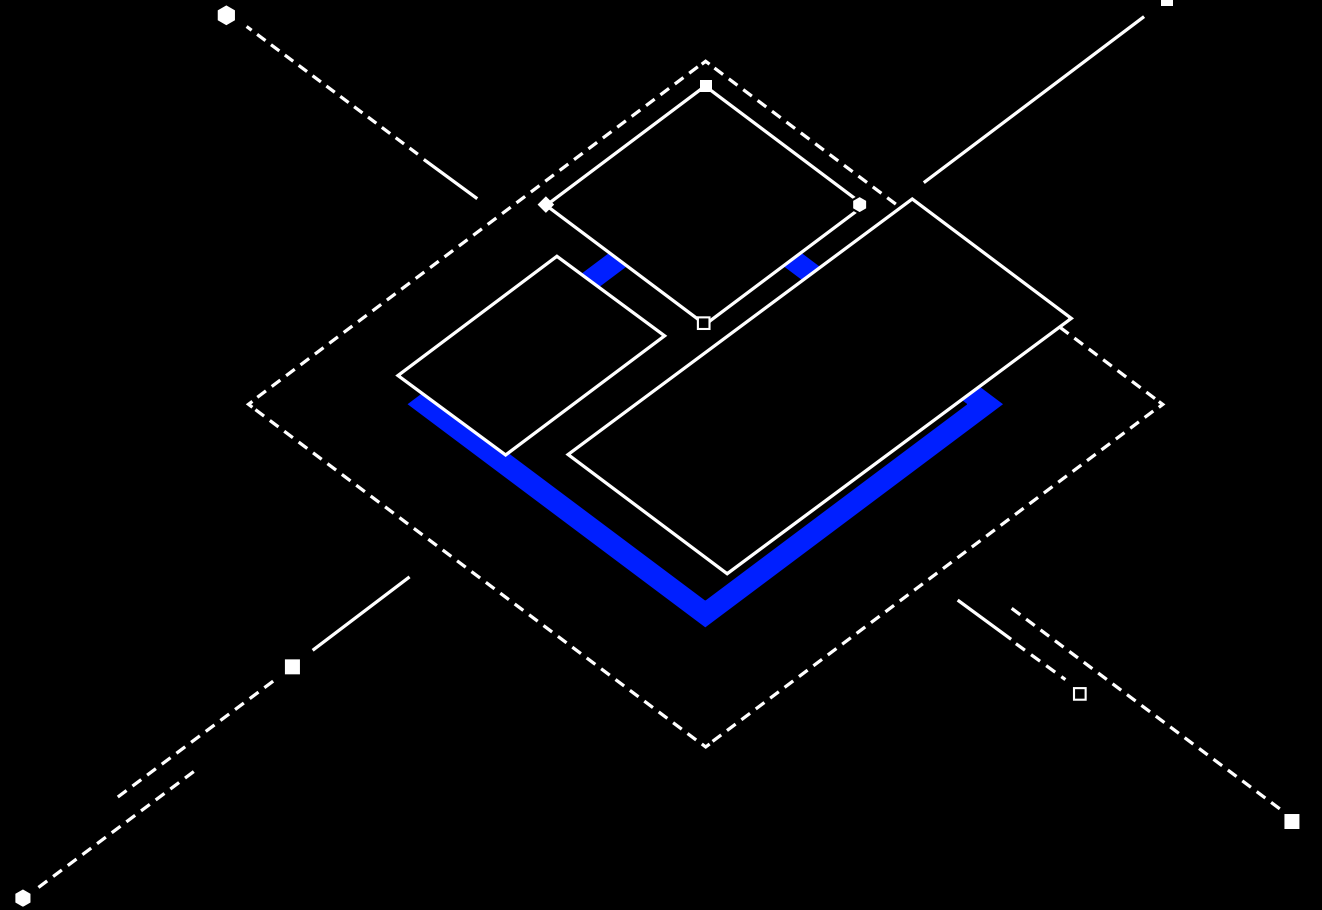

LICENSE MANAGEMENT

- Academic institutions have limited resources to manage license management effectively.
- Individual license models means licenses need to be assigned and unassigned as students join and leave.

REFINITIV WORKSPACE IS A POWERFUL AND INTELLIGENT LEARNING SOLUTION THAT MEETS THE NEEDS OF BOTH STUDENTS AND EDUCATORS

UNRIVALLED CONTENT AND MARKET DATA

ACCESS THE BROADEST AND DEEPEST COVERAGE

LEVERAGE APPLIED LEARNING USING REAL-WORLD DATA AND STATISTICS

40 BILLION

- Investment research
- Mergers and acquisitions
- People data
- Ownership
- Private company data
- Shareholder activism Intelligence
- Shareholding disclosures
- Syndicate loans and project finance
- Venture capital and private equity data

Reference data

Data to support security master and enterprise data management and asset set-up.

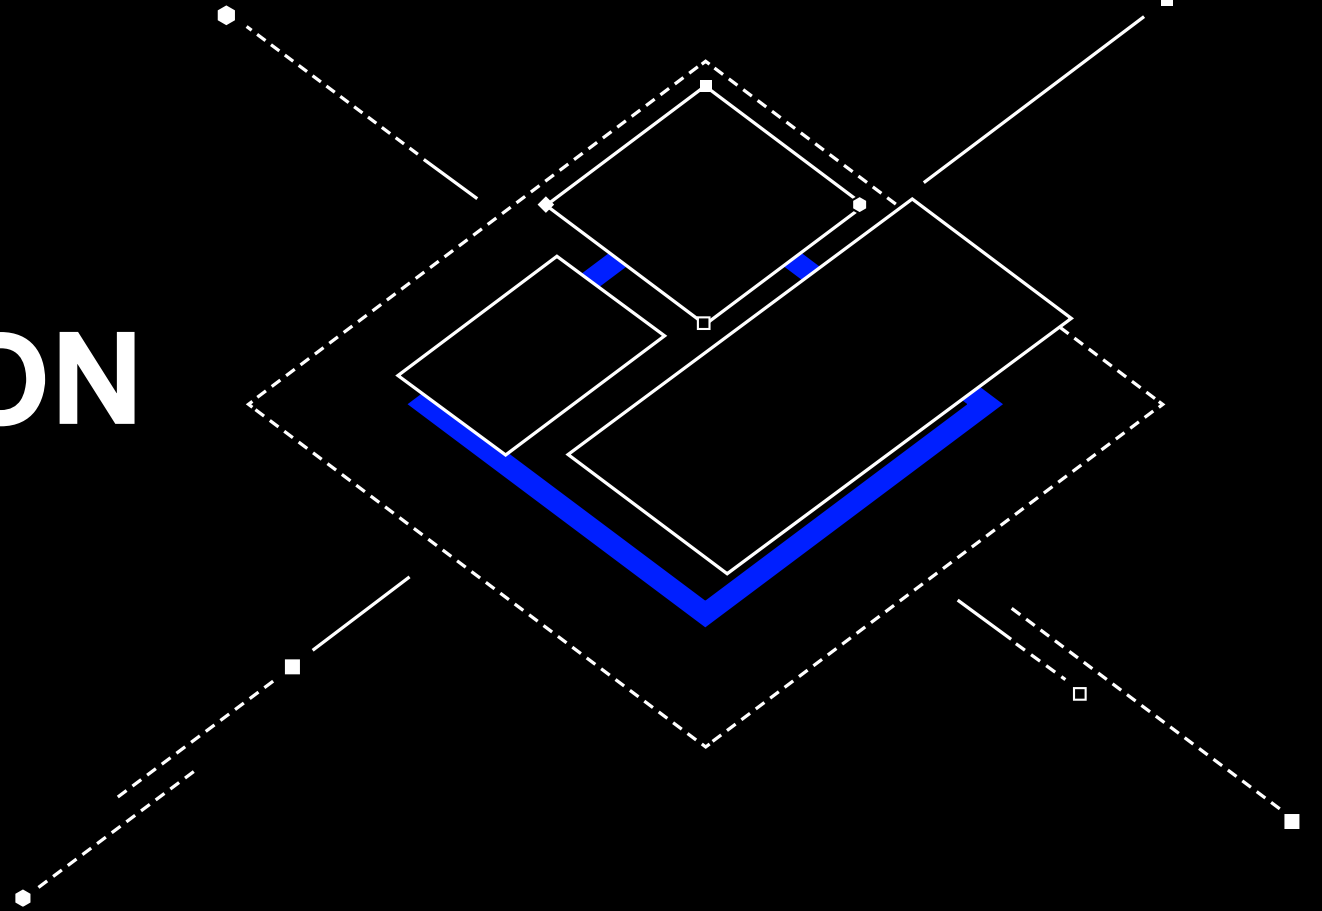

- Index constituents & weightings
- Industry classifications
- Symbology
- Terms and conditions

Analytics

Unique data sets support idea generation, due diligence and decisions.

- Deal analytics
- StarMine® quantitative analytics and models

NEXT-GENERATION FINANCIAL INTELLIGENCE

BRINGING FINANCIAL INTELLIGENCE TO ACADEMIC INSTITUTIONS

1

Boost your research with AI-powered search

We have built a much smarter, real-time financial market search facility that returns highly relevant results with minimal input.

With AI-powered intelligent search you can find the content students are looking for straight away, so that that they can focus on what's important and boost their research and learning.

The screenshot displays the UBS M&A Corporate Actions Calendar. On the left, there is a list of corporate actions for UBS.MC, including 'UBS (CH) IF - Eq Switzerland S&M Cap Pass II U' and 'UBS (CH) IF - Eq Switzerland S&M Cap Pass II I-A'. On the right, a news article is open, titled 'LIVE MARKETS-On the radar: Aston Martin and banking stocks - Reuters'. The article discusses Aston Martin's restructuring and the impact on banking stocks, mentioning that the bank's CEO is looking for a 'restructuring' of its wealth management unit.

2

Snapshot previews display key info quickly

Designed to show preview results with minimal screen interruption or searching, snapshot previews enables students to access the content they are looking for straight away, without even having to click search.

The screenshot shows a financial market dashboard. On the left, there is a table of market indices including FTSE 100 INDEX, CAC 40 INDEX, and others. In the center, there is a detailed view of Amazon (AMZN) stock performance, showing a price of 1,886.4679 USD and a chart of the stock price over time. On the right, there is a news feed with headlines such as 'Amazon increases institutional shareholder Community Trust...' and 'UPDATE 3-India orders antitrust probe of Amazon, Walmart's Flip...'.

BRINGING FINANCIAL INTELLIGENCE TO ACADEMIC INSTITUTIONS

3

Enhanced multi-platform experience

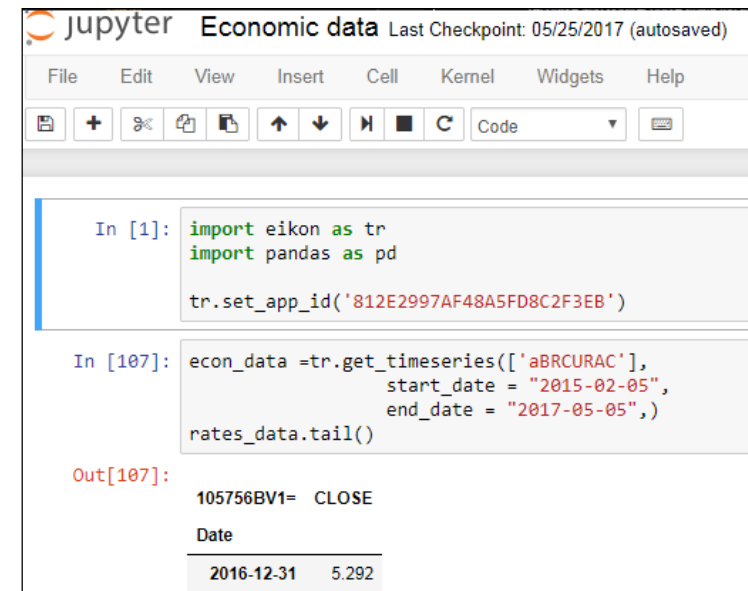

Students can continue their research seamlessly even away from university by accessing Workspace from their personal desktops or tablet via workspace.refinitiv.com/web

4

Open and agile

Students can conduct deeper data modeling and analysis with modern APIs and popular languages like Python, helping them broaden their knowledge of the markets.

They can also access the raw data, extract it, build it into models and applications – open access to our data – to drive innovation and your research.

The screenshot shows a Jupyter Notebook window titled "Economic data" with a last checkpoint of "05/25/2017 (autosaved)". The interface includes a menu bar (File, Edit, View, Insert, Cell, Kernel, Widgets, Help) and a toolbar with various icons. The code cell contains the following Python code:

```
In [1]: import eikon as tr
import pandas as pd

tr.set_app_id('812E2997AF48A5FD8C2F3EB')
```

The next cell shows the execution of the code to fetch economic data:

```
In [107]: econ_data =tr.get_timeseries(['aBRCURAC'],
start_date = "2015-02-05",
end_date = "2017-05-05",)
rates_data.tail()
```

The output of the second cell is a table with two columns: "Date" and "105756BV1= CLOSE". The output shows data for the date 2016-12-31 with a value of 5.292.

Date	105756BV1= CLOSE
2016-12-31	5.292

BRINGING FINANCIAL INTELLIGENCE TO **ACADEMIC INSTITUTIONS**

5

Single sign-on and license management capabilities

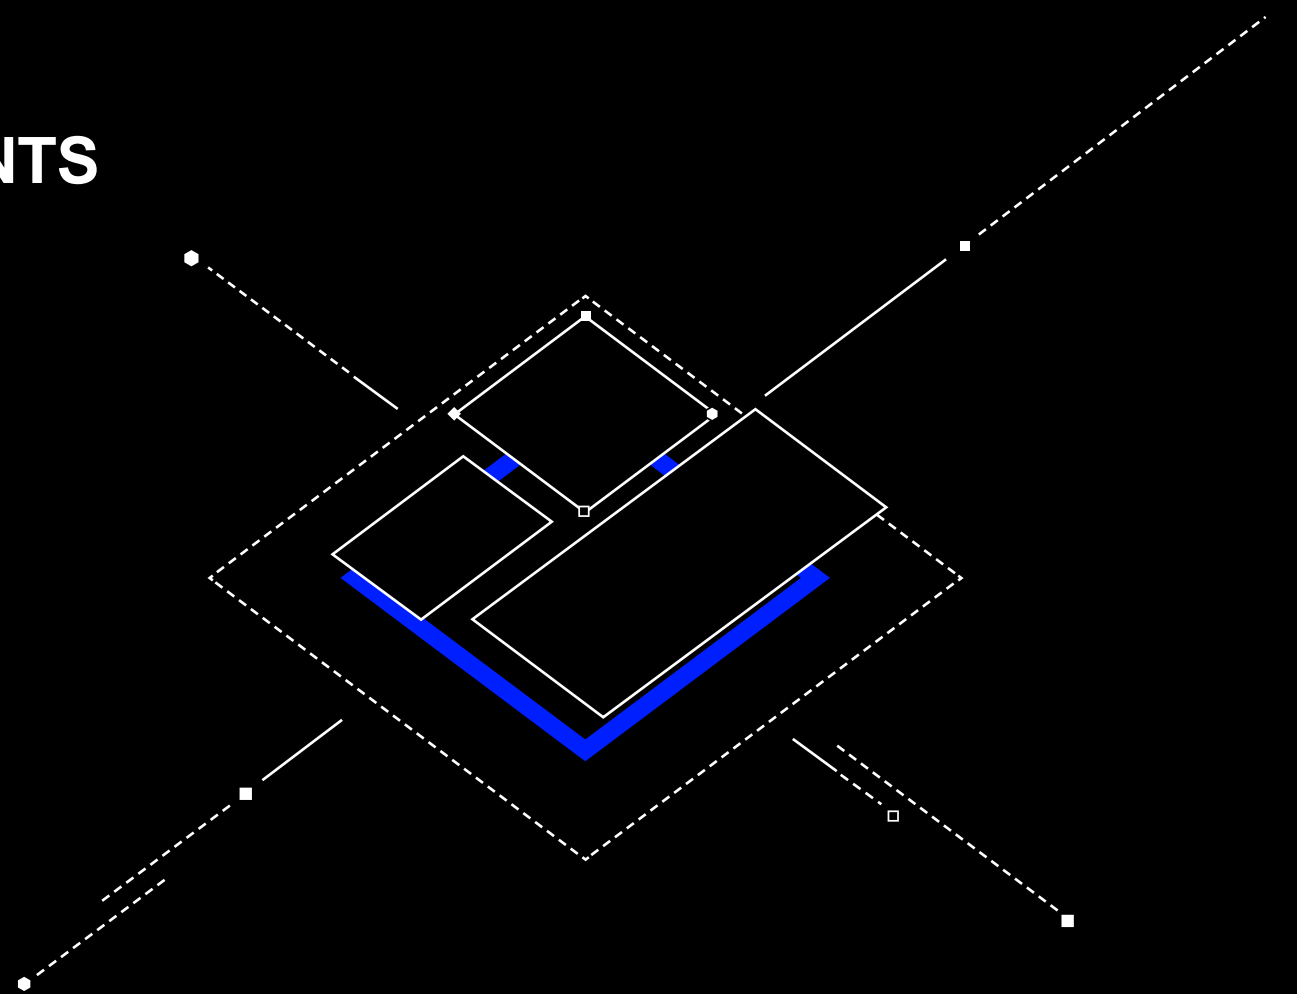

Single sign-on (SSO) ensures students will have a seamless user experience overall, boosting their productivity and helping them gain time to focus on what is important. SSO allows them to save searches, preferences, language settings, then sign off and pick up exactly where they left off without having to start all over again – giving them a customized and best-in-class personal experience.

Equally, SSO also gives educators greater control and lessens security concerns as it facilitates the deactivation of credentials when a student leaves the university or that user is no longer entitled to access Refinitiv Workspace.

Dedicated license management capabilities also facilitate this process, helping administrators manage licenses effectively and easily without resource constraints as students join and leave their academic institutions.
